Talking Points on Stupak/Pitts Abortion Ban

- YES on comprehensive health care reform!
- NO on the Stupak/Pitts anti-abortion amendment!
- Stupak/Pitts is a virtual ban on ALL abortions – in both the public option and private options, even if women are willing to pay out of pocket.
- Stupak/Pitts not only bans federal funds for abortion, but also restricts the type of coverage a woman could purchase **with her own money**.
- Under Stupak-Pitts, women will LOSE existing coverage for abortion!
- Stupak/Pitts will not end abortion– just your ability to access/afford one.
- Stupak/Pitts will deny abortion coverage for poor and middle-class women.
- Stupak/Pitts goes far beyond the Hyde amendment, and is an unacceptable, giant step backward for women. It is a LONG TERM BAN – if it passes, it will affect generations of women to come.
- Abortion IS health care. Investing in reproductive health services is an investment for healthier women and society.
- Stupak/Pitts could create a ripple effect - birth control coverage is the next choice to be slashed.
